≠ same for red

# Bollinger bands + MACD + Super trend

Price will move b/t two lines -

~~Resistance~~ Red & price  
Yellow & if the candle  
cross this line then market  
is in overbought zone (sell)  
the stock

~~Support~~ = Blue = Oversold Market.  
Buy

Non Confirmation is required.

Example: if the green candle is  
formed the other candle  
should be green.

# Fundamental analysis.

## Discounted Cash flow method

$$= \frac{24,00,000}{0.15} \Rightarrow 1.6 \text{ crore value}$$

$$= \frac{24,00,000}{0.12} \Rightarrow 2 \text{ crore}$$

$$= \frac{1.6 \text{ crore invest}}{2400000 \text{ return per year}} = \boxed{6.6} \text{ good because we can get the value in 6.6 years.}$$

Fibonacci low to high.

=> Negative PCR

Fibonacci high to low.

PCR 10 sell

PCR 11 buy

Fibonacci if greater than 50 or  
equal 50% then buy nifty

PCR 1v sell

PCR 1v buy

Fibonacci if greater than 50 or  
equal 50% then buy nifty

# Stoploss strategy <sup>loss</sup> 1 by 2 <sup>profit</sup>

7 to 8% loss bearing capacity

⇒ Why we apply stoploss

We apply stoploss to take the risk

Example

⇒ If I m sure that the next candle is profitable. Me paisa dalta hu lekin loss me ja rhi. hai tu me 6 to 8% tak ka risk lu ga us-uper tak risk ni lena.

⇒ Profit bhi ager 2 ka risk hai to profit mera 4 hona chahiye-

⇒ Crypto me bhi wesai pata hai agr volatile crypto hai to double top ke bad nikalna hai ya entry

## Types of chart patterns

Double top, triple ~~top~~ <sup>top</sup> & bottom  
top per hai common

Bottom me hai-

## Continuation pattern ka Rectangle

is me price continue rehti hai  
ye tab jab market uper ja kr  
ya nechai ja k stable hui  
ho entry do candle bananai  
ke bad le gair.

## Head and shoulder charts.
